Projects

Frame Flow

🔗 <https://frameflow-theta.vercel.app/home>

Frame Flow is a smart *image and video processing* tool that optimizes media for *social platforms*. It offers intelligent cropping for images to fit various social media dimensions while preserving key content. For videos, it provides **AI-powered** preview playback to highlight important moments and efficient compression for reduced file size without quality loss. Built with **Next.js**, it features **Clerk** authentication, **DaisyUI** and **Tailwind CSS** for styling, and **Prisma** with **NeonDB** for seamless data management.
